ATTENTION:

Surge® Broadleaf Herbicide for Turf (EPA Reg. No. 2217-867-AA) was registered by the Department of Pesticide Registration (DPR) in California on February 24, 2006. Additional mitigation measures for the broadcast applications of this product on turfgrass have been added and two (2) instructions of the Directions for Use are listed as follows:

- **Do not apply product to bare ground.**
- **California: Make broadcast applications only between March 1 and September 1. If troublesome weeds appear during other times of the year, a spot application can be made. While irrigation is necessary and important for plant growth, apply irrigation water efficiently so that no more than 125% of the net irrigation requirement is applied for any irrigation event. Apply efficient irrigations for six months following application of sulfentrazone containing products.**

This supplemental labeling is intended for products that have been distributed and sold or for products offered for sale to end users by wholesalers or retailers. *This labeling must be in possession of the user at the time of herbicide application.*

Read the entire label affixed to the container of Surge Broadleaf Herbicide for Turf before applying. All Precautionary Statements, Directions for Use and restrictions presented on the container labels are to be followed.

ISSUE DATE: January 18, 2007.

EXPIRATION DATE: January 18, 2009.
