

EARN YOUR MEDALLION

With an effective active ingredient and proven performance to control the toughest diseases, you can have it all when it comes to disease control.

Medallion® WDG fungicide delivers reliable, broad-spectrum control of major foliar, root and stem diseases at low use rates. As the only fungicide in its chemical class (FRAC 12) growers trust Medallion as an essential part of their disease management program.

Medallion WDG protects plants so growers can market clean, high-quality crops.

Strong performance against major diseases

Medallion WDG is a strong performer against major foliar, root and stem diseases of ornamental plants. *Fludioxonil*, the active ingredient in Medallion WDG, inhibits spores from germinating and penetrating plant tissue. Upon application, Medallion WDG binds quickly to the surface of leaves and roots, creating a barrier of protection.

With a low use rate of 1-4 oz./100 gal., Medallion WDG is an economical choice for long-lasting control when used as a soil drench or foliar spray:

- 21-28 day residual control as a drench
- 7-14 day residual control when applied to foliage
(Rainfast within one hour of application)

FOLIAR DISEASES (1-4 oz./100 gal.)

<i>Alternaria spp.</i>	<i>Myrothecium spp.</i>
<i>Botrytis spp.</i>	<i>Rhizoctonia spp.</i>
<i>Cercospora spp.</i>	<i>Septoria spp.</i>
<i>Cylindrocadium spp.</i>	

CROWN, STEM & ROOT DISEASES (1-2 oz./100 gal.)

<i>Cylindrocadium spp.</i>	<i>Sclerotium rolfsii</i>
<i>Fusarium spp.</i>	<i>Thielaviopsis basicola</i>
<i>Rhizoctonia spp.</i>	

Medallion WDG is registered for use in:

- Greenhouses, shade and lath houses (and other enclosed structures)
- Outdoor field, container and conifer nurseries*
- Interiorscapes
- Commercial and residential landscapes*

*Not registered for outdoor or landscape use in Hawaii
