

Liquid Aeration - Spray Program Thatch Relief™ + Oasys Ultra™

= Liquid Aeration Program

Benefits

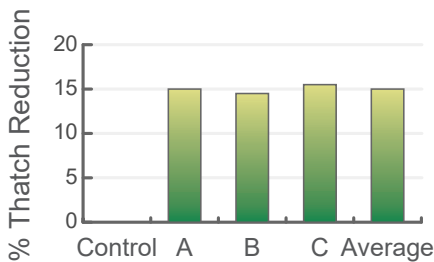

- Accelerates decomposition of excessive thatch
- Contains a combination of beneficial bacteria, plant enzymes, and surfactants
- Non-burning and fortified with humic acids and sea plant extracts
- Increases percolation rates in dry, hard, and compacted soils
- Food source for microbial populations
- Steroidal saponins act as a plant biostimulant
- On average reduces thatch by 15% in approximately 45 days
- Applied 2-3 times per growing season or as needed
- 3 oz/1,000 sq. ft of each product

“It has been a huge labor savings for us. You have your offset of your labor vs. your product. Whatever you’re charging for your normal core aeration, I think you’re going to find it works.”
