THAW MASTER
COMMERCIAL STRENGTH ICE MELT

- **MELTS FAST
TO TEMPS
AS LOW AS
-5° F!**

- **THE TOUGHEST
INDUSTRIAL
ICE MELTER
IN ITS CLASS!**

COATED WITH
AMC
THE CATALYST
THAT IGNITES MELTING POWER

THE PERFORMANCE ENHANCING
CATALYST THAT PROVIDES
INSTANT MELTING ACTION

Still need an exceptional ice melter without the high price tag? THAW MASTER and AMC, the catalyst that ignites melting power, team up to offer a fast, sustaining melting action without the outrageous cost. THAW MASTER is the economical choice, yet remains extremely productive even in the worst weather. AMC, calcium chloride & magnesium chloride, three high-powered raw materials, combine to quickly generate heat and draw moisture from the air to ensure a speedy thaw even at temperatures as low as -5°F.

Applying too much product leads to major headaches, which is why THAW MASTER is dyed green, making the spreading and placement of product easier. This allows the end-user to apply the product where needed and in the correct amounts; minimizing damage to vegetation and concrete.

If a safe, clear, clean surface and workable budget is what you need, THAW MASTER is the ice melter for you!

COLD WEATHER POWER

THAW MASTER's concentrated crystals start working right away to melt snow and ice even when the temperature gets as low as -5°F.

MULTI-INGREDIENT ACTION

THAW MASTER's blend of ingredients generates a synergy giving you more melting power than each ingredient individually.

GREEN DYE

A water soluble, non-staining food dye is added to THAW MASTER to aid in visibility during the application process. The green color makes the spreading process easy and greatly reduces the odds of over-application, which can be detrimental to surrounding vegetation and poor quality concrete.

SAFE TO THE OUTDOORS

THAW MASTER will master winter's worst snow and ice, but is safe to vegetation and wildlife when used as directed.

SAFE ON CONCRETE & TREATED WOOD

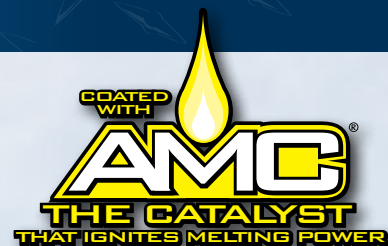

THAW MASTER doesn't contain any ingredient that will chemically alter or damage air-entrained quality concrete or treated wood when used as directed.

CLEAN, NO RESIDUE

THAW MASTER breaks down to a colorless and odorless liquid so it doesn't leave a white film or slippery oily residue on shoes, sidewalks, driveways or carpets.

NO HASSLE STORAGE & HANDLING

THAW MASTER has an unlimited shelf life and needs no special storage or handling.

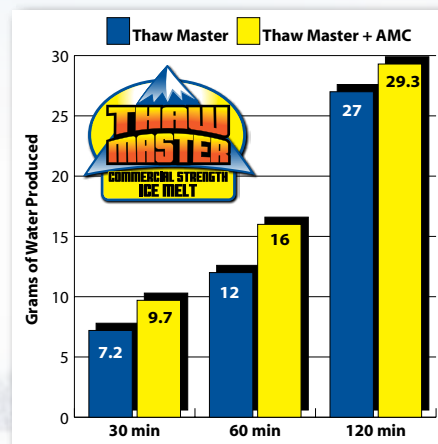

Products coated with EC Grow's exclusive deicing enhancer accelerate the natural melting process and provide a safe, manageable, and ice-free environment.

MELT ICE FAST WITH THAW MASTER AND AMC

THAW MASTER is coated with AMC, the catalyst that ignites melting power, for instant melting action! AMC provides THAW MASTER with the boost it needs to conquer any winter weather - even when temperatures drop to -5°F.

So for speed, low-temp melting power and long-lasting results, reach no further than THAW MASTER Ice Melt with AMC!

DIRECTIONS:

Spread at the rate of about 1/4 cup per sq. yd. Leaves no messy white residue to coat sidewalks or to be tracked into buildings. Remove the slush immediately to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. Will not harm carpet or floors when used as directed.
