AND MORE!

The Grow Co's Ammonium Sulfate provides a readily available source of nitrogen and sulfur, nutrients commonly used to support plant development and overall nutrient balance. Nitrogen is associated with vegetative growth, while sulfur is involved in various metabolic functions within the plant.

This Grow Co's Ammonium Sulfate is highly soluble, allowing for application via dry spreading or incorporation into liquid spray solutions, depending on crop and soil needs.

GUARANTEED ANALYSIS

Total Nitrogen (N)	21%
21% Ammoniacal Nitrogen	
Available Phosphate (P2O5)	0%
Soluble Potash (K2O)	0%
Sulfur (S)	24%
24% Combined Sulfur	

Derived from: Ammonium Sulfate

Especially beneficial for your acidic soil-loving plants, such as:

Trust in The Grow Co's Ammonium Sulfate to ensure optimal sulfur levels for vibrant, healthy blooms across all your plants.

DIRECTIONS FOR USE

General Use Rate: 1 lb. (2.5 cups)

ESTABLISHED TURF

 Frequency: Every 8 weeks
Directions: Spread 4 lbs. for every 1,000 sq. ft. before the onset of spring. Ensure grass is dry during application. To prevent fertilizer burn, water thoroughly post-application.

GARDEN, FLOWERS & SHRUBS

 Dosage: 2.5 cups for 1,000 sq. ft.
For individual plants: Apply 1/2 tsp. near the drip line. Make sure plants are dry when fertilizing, and water them after.

TREES

 Timing:
Early spring and late summer

Method 1:

For surface application under tree limbs, use 1 cup of fertilizer for every inch of tree trunk diameter. Measure the trunk 5 feet above the ground.

Method 2:

For a deeper root reach, create holes around the tree's drip line using a pointed tool, spacing them 3-4 feet apart. Deposit 3/4 cup of fertilizer into each hole.
