for  
Stronger  
& Happier Plants

8 fl oz  
(236ml)

Net Wt.  
0.601 lb  
(273g)

PACK OF ALL TRADES  
MASTER OF PUNS

## LIQUID NOURISHMENT FOR STRONGER, HAPPIER HOUSEPLANTS

This plant food is perfect for beginner and experienced plant parents alike. Packed with the nutrients that houseplants need to grow bigger and stronger, our liquid fertilizer ensures gentle feeding and nourishment. Now let's get growing!

### HOW TO USE

#### Mixing & Timing

Use Indoor Plant Food every watering following the mixing instructions below /// **SHAKE BOTTLE WELL BEFORE EACH USE**

### GALLON MIX

1 capful (1/2 tablespoon)  
per gallon of water

**LESS IS MORE!** Do not use more plant food than the stated dilution rate.

During winter, dormancy sets in and houseplants need time to rest—Reduce feeding to one to two times a month using the mix rate above.

#### Water & Application

Use filtered, bottled, or rainwater for best results. Unfiltered tap water often harms plants and stunts growth. Use a clean container to mix and apply solution.

#### When To Water

Houseplants vary greatly with their water requirements. This also changes depending on their size and the time of year. Plants need more water when actively growing from spring into fall. Remember, underwatering is better than overwatering—which encourages fungus and root rot.

To tell if your plants need water, place your finger one inch deep into the potting soil. If moist, avoid watering and reassess later. If dry, it's time to water again.
