

TODAL

NEMATICIDE/INSECTICIDE

Todal is an emulsifiable concentrate designed to move quickly into the soil to where parasitic nematodes are found for prompt, comprehensive control at the source. It helps shield roots from nematode damage and drought, which results in more durable, stress-tolerant turf that can recuperate more quickly from stresses like disease and aeration. Mixing Todal with a fungicide can improve root quality and result in a healthier, more tolerant plant.

Features and Benefits

- Contains 0.15 lbs of abamectin per gallon.
- Controls the most problematic nematode species on contact including sting, root-knot and lance.
- Allows flexible application rates and season-long rotations for effective agronomic program.
- Can be used in rotation with NIMITZ® Pro G for a complete Nematode program.
- Todal is compatible with Quali-Pro's Propiconazole 14.3, Strobe 2L, Strobe 50WG and Mefenoxam 2 AQ fungicides.

Active Ingredient

1.9% Abamectin

Use Sites

Golf course greens, tees and fairways

Effective Against

Turf-parasitic nematodes, bermudagrass mites

Packaging

4 x 1 gallon
