

TORO.**570Z & 570S SERIES SPRAY AND SHRUB BODIES****WATER
SMART™**

RUGGED – FLEXIBLE – VERSITILE – RELIABLE: Toro® 570Z Series pop-up spray bodies and 570S Series shrub adapters and shrub risers provide a durable, professional-grade solution for residential and commercial contractors to satisfy all new installation and retrofit requirements. In combination with Toro fixed spray and rotating nozzles, 570Z and 570S Series spray and shrub models can be configured in hundreds of combinations and present an unparalleled range of flexibility. Available in bottom-inlet shrub versions and pop-up body heights of 2", 3", 4", 6" and 12" models (side inlet thread options on 6" and 12"). 570Z and 570S Series spray and shrub models are further available with water-saving factory-installed X-Flow® Technology, and/or integrated Pressure Regulating features. Trusted for over 25 years, 570Z and 570S Series spray and shrub models are the ideal choice.

FEATURES & BENEFITS

Zero Flush Wiper Seal & Ratcheting Riser

Wiper Seal helps eliminate flushing on pop-up (allows more sprinklers per zone). Ratcheting Riser for quick and precise arc adjustment on all pop-up models.

X-Flow Technology

X-Flow in-stem flow shut-off technology built into the riser restricts water loss by 99% should the nozzle be removed or damaged. The exclusive X-Flow technology reduces water waste, landscape erosion, and wet hardscape safety concerns. X-Flow also allows for 'dry' nozzle and filter replacement or system maintenance while the system is running.

Pressure Regulator

Built in pressure regulation to a consistent 30 PSI is available on 570Z and 570S shrub models. WaterSense® certified to prevent water waste due to misting and fogging caused by high-pressure environments.

One-Piece Check Valve (570CV)

One-piece check valve prevents low-head drainage on elevation changes of up to 10 feet. Available factory pre-installed or field install.
