

TORO®

PRECISION™ SERIES SPRAY NOZZLES

**WATER
SMART®**

Toro® Precision™ Series Spray Nozzles are the most efficient spray nozzles available and feature proprietary H₂O Chip Technology. With a precipitation rate of 1" per hour, Precision™ Series Spray Nozzles help irrigation professionals better manage water usage, eliminate runoff, and reduce their customers' water bills. These nozzles are available in a wide variety of arcs and radii, as well as Toro (male) and female-threaded bodies, making them ideal for large scale installations and retrofits. In addition, the best-in-class Precision™ Series Spray nozzles are available with factory-installed Pressure Compensating Discs (PCD).

FEATURES & BENEFITS

Patented H₂O Chip Technology

Each nozzle contains one or more H₂O chips that create a high frequency oscillating stream and deliver a precipitation rate of 1" per hour – an industry first – while using up to 35% less water than a standard MPR nozzle.

Pressure-Compensating Versions Available

At a fraction of the cost of a pressure-regulating spray head, pressure-compensating Precision™ Series Spray Nozzles maintain a 1" per hour precipitation rate and minimize misting and water waste that results from higher pressure systems.

Design and Retrofit Effectiveness

The lower flow rate of Precision™ Series Spray Nozzles maximizes design efficiency and helps reduce overall material costs based on the need for fewer valves and controller stations.

Precision™ Series Spray Nozzles with Pressure Compensation maintain a 1" per hour precipitation rate and minimizes misting and atomizing when system pressure exceeds 40 psi. Integrated pressure compensation can minimize the need for a regulating head at a fraction of the cost.

Time Savings

All Precision™ Series Spray Nozzles can be combined on the same zone for greater design and installation flexibility, which equates to time savings on the job site. Whether a new installation or retrofit project, the comprehensive range of Precision™ nozzles meets the needs of any project and all models are available in Toro (Male) and Female threads.

Nine Arcs, Plus Side and Center Strips Available

Side and Corner Strips Available

Precipitation rate (50% square spacing): 1" per hour even after radius reduction of 20%.

Patented H²O Chip Technology

On the outside, Precision™ Series Spray Nozzles look like standard spray nozzles, but the performance of the patented H²O Chip Technology on the inside is unmatched. The H²O Chips create high-frequency streams of water that oscillate at a rate of 200 cycles per second. The result is a matched precipitation rate of 1" per hour – an industry first – while using up to 35% less water than a standard spray nozzle.

Water enters a specially designed chamber within the H²O Chip where the water expands and collapses, which creates an oscillating effect.

Consistent-sized water droplets exit the Chip in the designed arc pattern and radius, with precise edge definition, class-leading distribution uniformity and reduced water usage.

WATER MANAGEMENT HIGHLIGHT

Patented H²O Chip Technology

Water expands and collapses inside the H²O chip, creating a high frequency oscillating stream that meets the desired distance of throw using 35% less water.

SPECIFICATIONS

Operational

- Radius: 5'-15'
- Operating pressure range: 20-75 psi
- Recommended operating pressure: non-Pressure Compensating—30 psi, Pressure Compensating—50 psi
- Flow Rate: 0.04-2.4 gpm
- Nozzle trajectory:
 - 5': 5°
 - 8': 10°
 - 10': 15°
 - 12': 20°
 - 15': 27°
 - Corner and Side Strips: 20°

Warranty

- Two years

Water Savings

Precision™ Series Spray Nozzles are more efficient than standard spray nozzles because they apply water more slowly and evenly. For example, with 32% percent lower flow than a standard 12H spray nozzle, a 12H Precision™ Series nozzle still achieves the same distance of throw. At 30 psi the comparative water usage is:

12-H Spray Nozzle 1.09 gallons per minute

Precision O-T-12-H 0.74 gallons per minute

WATER SAVINGS 0.35 gallons per minute or 32%

When consideration for water saved is taken for an entire system and multiplied across a full irrigation season, the water savings presented by using Precision™ Series Spray Nozzles could equate to thousands of gallons of water saved per year.

Cost Savings

More nozzles can be designed into a zone due to the lower flow rates of Precision™ Series Spray Nozzles, which could present lower system costs given the need for fewer valves, and in some cases, a less expensive controller. The following table illustrates the system cost efficacy of using 12H Precision™ Series Spray Nozzles versus standard 12H spray nozzles (assumes a 30 psi operating pressure):

AWWA Meter Size	Flow (gpm)	Friction loss (psi)	# of functional Standard 12H Sprays	# of functional Precision™ 12H Sprays
5/8"	12	5.1	9	16
3/4"	18	5.2	13	24
1"	30	5.3	23	40

Specifying Information-Precision™ Series Spray Nozzle

O-X-XXXX-XXXX-P				
Nozzle	Thread	Radius	Arc	PCD
O	X	XXXX	XXXX	P
O—1" Per Hour	T—Toro Male-Threaded Nozzle Blank—Female-Threaded Nozzle	5—5' 8—8' 10—10' 12—12' 15—15' 4X15—4'X15' 4X30—4'X30' 4X9—4'X9' 4X18—4'X18'	60—60° Q—90° T—120° 150—150° H—180° 210—210° TT—240° TQ—270° F—360°—Full-circle LCS—Left Corner RCS—Right Corner SST—Side Strip	P—Pressure Compensating
Example: A female-threaded Precision™ Series Spray with a spray radius of 12' and a 90° arc would be specified as: O-12-Q Example 2: A male-threaded Pressure-Compensating Precision™ Series Spray with a spray radius of 10' and a 180° arc would be specified as O-T-10-HP
