

NEW SlideMaster® Infield Topdressing

- We are introducing the best product option in the category of vitrified clay and expanded shale
- SlideMaster is mined, fired, crushed, screened, and washed.
- Specially formulated particles are consistent with Pro League sizing to provide the ultimate sliding surface for skinned infields!
- The particles let water pass through to the infield skin, helping improve water management especially in hot or dry weather.
- Researched, developed and tested for more than 2 years with MLB, MiLB, College, and Park & Rec

TURFACE SLIDEMASTER™ PRODUCT ATTRIBUTES

Turface SlideMaster™ features unrivaled quality, consistency and natural color

Permanent all-natural red color of SlideMaster blends perfectly with Heritage Red and Champion Brown

Sub-angular particle provides an excellent sliding surface while allowing water to quickly penetrate to the infield skin

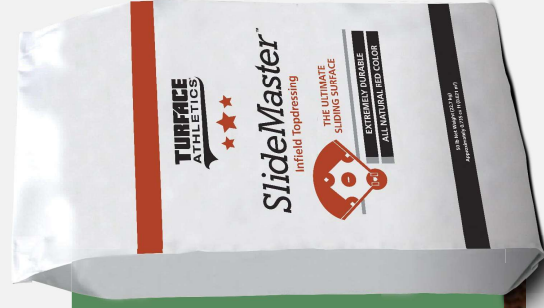

Durable, long-lasting topdressing for the ultimate sliding surface

Won't stain uniforms

Particles flow easily through all drags and screens for a professional finished surface

PRODUCT TESTING

Particles have highest level of durability and provide a customer more value for their money than vitrified clay or other expanded shales
