

Engineered Lighting Solutions

Captive screws stay with shroud

Optional shrouds for maximum design flexibility

Shatter proof polycarbonate dome lens

Step lens reduces water pooling

Multi position lens holder

25' wire lead to support HUB Wiring System.

Composite body improves water sealing.

NOVA Knights Series

Recently re-engineered based on real-world feedback in harsh conditions, the Nova's new composite body and internal potting material work in tandem to seal critical components from water intrusion. The single piece brass shroud is offered in four different configurations for maximum design flexibility. From retaining walls to walkways, the Nova will provide the artful lighting effect and durability you are looking for.
