

Read entire label before use. Yard Gard™ is an all-natural product designed to deter deer and rabbits. BGA Industries, LLC represents that the ingredients in this product qualify for exemption from registration under FIFRA, section 25 (b); therefore, this product has not been registered by the U.S. Environmental Protection Agency.

PRECAUTIONARY STATEMENT

This product can cause irritation to the eyes, mouth, lungs and skin. Avoid breathing dust; avoid contact with eyes. Should eye contact occur, flush eyes well with large amounts of fresh water. Wash hands thoroughly with soap and water after application of this product. Keep children and pets off treated area until after the first watering session. Allow grass to dry before allowing children or pets to play on the treated area.

DIRECTIONS FOR USE

Apply Yard Gard™ in a 10 foot zone completely surrounding the plants and shrubs to be protected at settings and application rate listed below. For gardens, apply Yard Gard throughout the garden and extend a 10 foot zone around the perimeter of the garden. For best results, water the treated area twice a week for the first two weeks; water activates the ingredients. Allow 3 to 5 days for the Yard Gard ingredients to migrate into the soil. Before the animals are near enough to forage on the plant(s); they will smell Yard Gard and be repelled. Set spreader to deliver a medium application of 4 lbs. of product per 1000 square feet of lawn or garden area. Consult your spreader instructions for settings equivalent to the Scott Basic Spreader® setting of 4.

Delux®, EdgeGar®, LawnPro® &
SpeedyGreen®-4

COVERAGE: This package size of 20 lbs. (9.1 kg) will cover approximately 5000 square feet at a medium spreader setting. One application at medium flow rate should perform satisfactorily. This product affects the animals' sense of smell, which conditions the animal to forage elsewhere. Since you are conditioning a wild animal, the exact number of animals foraging in the treated area may not be known; additional applications may be necessary in 30 days in order to condition all animals involved.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

Storage: Store in the original package in a cool dry place and out of reach of children and pets.

Disposal: Empty container may be disposed of in regular trash. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available.
