YARD GARD for deterring critters

DETERS:
**Moles, Voles, Armadillos,
Chipmunks, Gophers, Ground Hogs,
Skunks and Squirrels**

Read entire label before use.

Yard Gard™ is an all natural product designed to deter burrowing and rooting animals. **BGA Industries, LLC** represents that the ingredients in this product qualify for exemption from registration under FIFRA, Section 25 (b); therefore, this product has not been registered by the U.S. Environmental Protection Agency.

PRECAUTIONARY STATEMENTS

This product can cause irritation to eyes, mouth, lungs and skin. Avoid breathing dust; avoid contact with eyes. Should eye contact occur, flush well with large amounts of fresh water. Wearing of mask or goggles and gloves are recommended. Wash hands thoroughly with soap and water after application of this product. **Yard Gard™** contains pepper; if allergic to pepper, avoid use. Keep children and pets off treated area until after the first watering session; allow grass to dry before allowing children or pets to play on the treated area.

DIRECTIONS FOR USE

Apply **Yard Gard™** by spreader to lawns, gardens, mulched areas and around shrubs. Water the treated areas twice per week for the first two weeks; water releases the ingredients. For best results allow 7 to 14 days for the ingredients to migrate through the soil.

Set spreader to deliver medium application. Consult your spreader instructions for settings equivalent to the Scott Basic Spreader setting of **3**.

Suggested Settings for Other Spreaders

Drop Spreaders: RepublicEZ – 7; Scott AccuGreen – 6; Sears Drop – 6.
Rotary Spreader: Earthway – 8; RepublicEZ – 3; Sears Rotary – 3; EasyGreen – 26 ½
Scott's: Standard, Delux, EdgeGar, LawnPro & SpeedyGreen – 4

COVERAGE This package size of 20 lbs (9.1 kg) will cover approximately 5000 square feet at a medium spreader setting. One application at medium flow rate should perform satisfactorily. This product affects the animals' sense of smell and taste, which conditions the animal to forage elsewhere; it does not kill the animal. Since you are conditioning a wild animal, the exact number of animals foraging in the treated area is usually unknown; additional applications may be necessary in 30 days in order to condition all animals involved. Heavy or thick layers of dead grass may inhibit the product granules from contacting the soil/ground and interfere with dispersing the ingredients into the soil; if this is the case, remove excess dead grass prior to the application of **Yard Gard™**.

STORAGE AND DISPOSAL

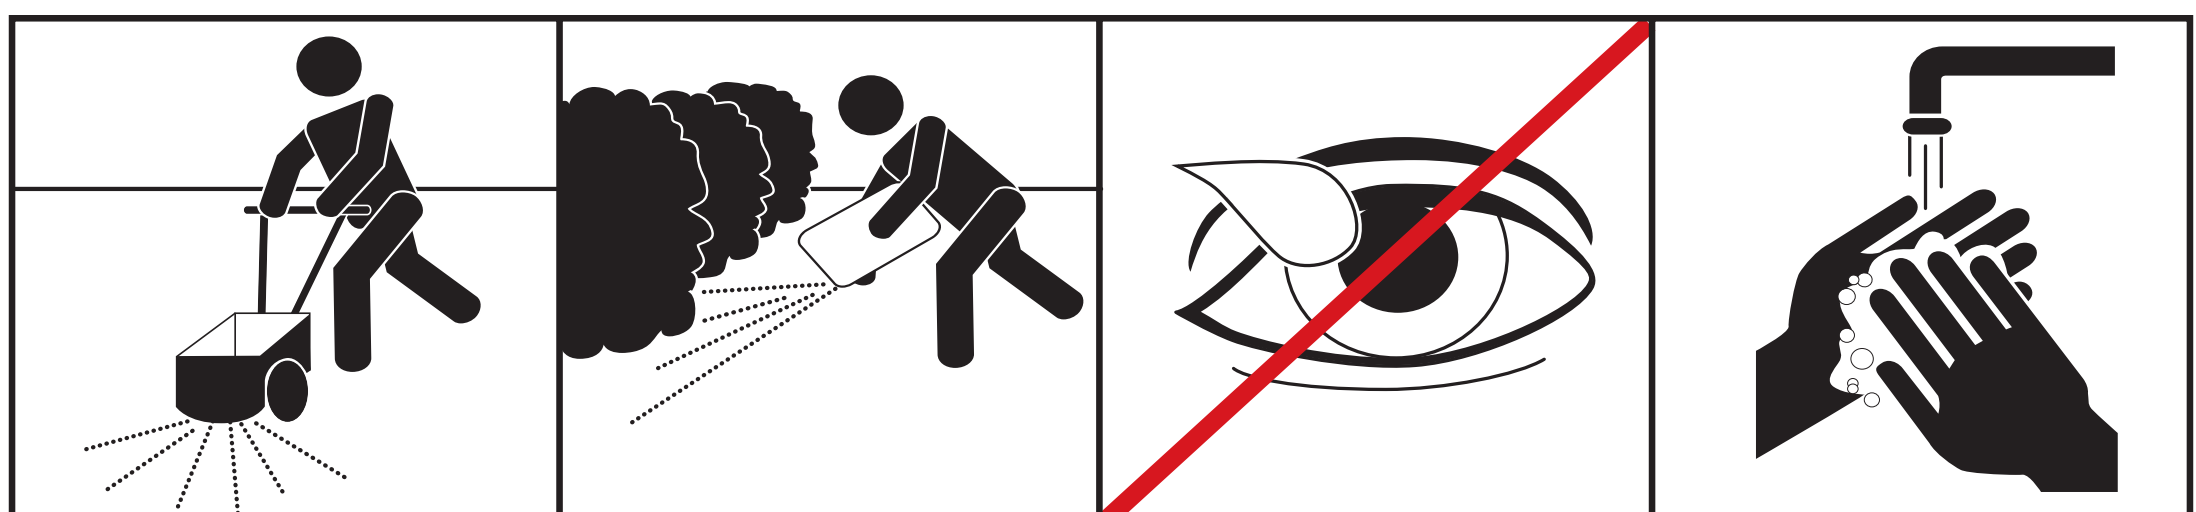

Do not contaminate water, food, or feed by storage and disposal.

Storage: Store in the original package in a cool dry place and out of reach of children and pets.

Disposal: Empty container may be disposed of in regular trash. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available.
