FIND WHAT YOU ARE AFTER

To build great things, you need a great resource. Whether it's sitting on the shelf in a product or standing behind the counter in an answer - find what you're after at SiteOne Landscape Supply

Increasing Profit With A Ride-On Spread/Spray Unit

Increasing your profit is easy with Ride-On units like the LESCO® Chariot SPX, PermaGreen™ Triumph, or L.T. Rich Z-Spray's.

How?

▲ Productivity is increased because application time is reduced significantly. This means more turf can get treated in one day (see chart below).

▲ The increased productivity could result in needing fewer employees (labor).

▲ Many PermaGreen™ owners have reported the unit can do the work of 1.5 – 2 applicators.

▲ Want to know how much you can save in year one? Simple: Employee Wage (including benefits) + Cost of Ride-On = Net Savings (Profit).

▲ Consistent application speed throughout the whole day means you are not under or over applying product.

▲ Under applying could result in service call and possibly lost customers.

▲ Over applying wastes money.

ESTIMATED APPLICATION TIME NEEDED TO TREAT VARIOUS LAWNS USING DIFFERENT EQUIPMENT

EXAMPLES	10,000 ft. (Hr: Minutes)	20,000 ft. (Hr: Minutes)	1 Acre (Hr: Minutes)	4 Acre (Hr: Minutes)
1 Trip Hose-End Spraying	0:09	0:18	0:39	2:33
1 Trip Push Spreading	0:07	0:13	0:29	1:54
TOTAL SPREAD/SPRAY TIME	**0:16**	**0:31**	**1:08**	**4:27**
LESCO® HPS Chariot (spread only)	0:05	0:10	0:21	1:23
LESCO® HPS Chariot & Hose-End Spraying	0:14	0:28	1:00	3:56
PermaGreen™ Triumph	0:03	0:06	0:13	0:50
L.T. Rich Z-Spray (intermediate)	0:03	0:06	0:13	0:50
L.T. Rich Z-Spray (max)	0:03	0:05	0:10	0:40

Hose-End Spray width of 6.5' @ 2MPH | PermaGreen™ Triumph based on width of 8' @ 5 MPH
