Assembling Electric Bed Lift

- Raise hood to get access to under the dash panel.
- Remove electric switch plug in dash and place electric switch into dash hole. See Illustrated Parts.
- Plug switch into a marked connector that already exists on the vehicle wire harness.
- Plug relays into sockets marked Bed Lift.
- Raise cargo box manually to upright position using the handle on the drivers side of box.
- Place support rod into the slot when cargo box is fully raised.

WARNING: Make sure support rod is securely locked before leaning into engine and transaxle area of vehicle.

- Connect electric lift actuator to the rear frame assembly and cargo box frame with clevis pin and cotter pin. See Illustrated Parts.
- Connect the electric lift wire harness into the two-pin harness connector with red/yellow wires.
- Disconnect the manual support rod from the cargo box.

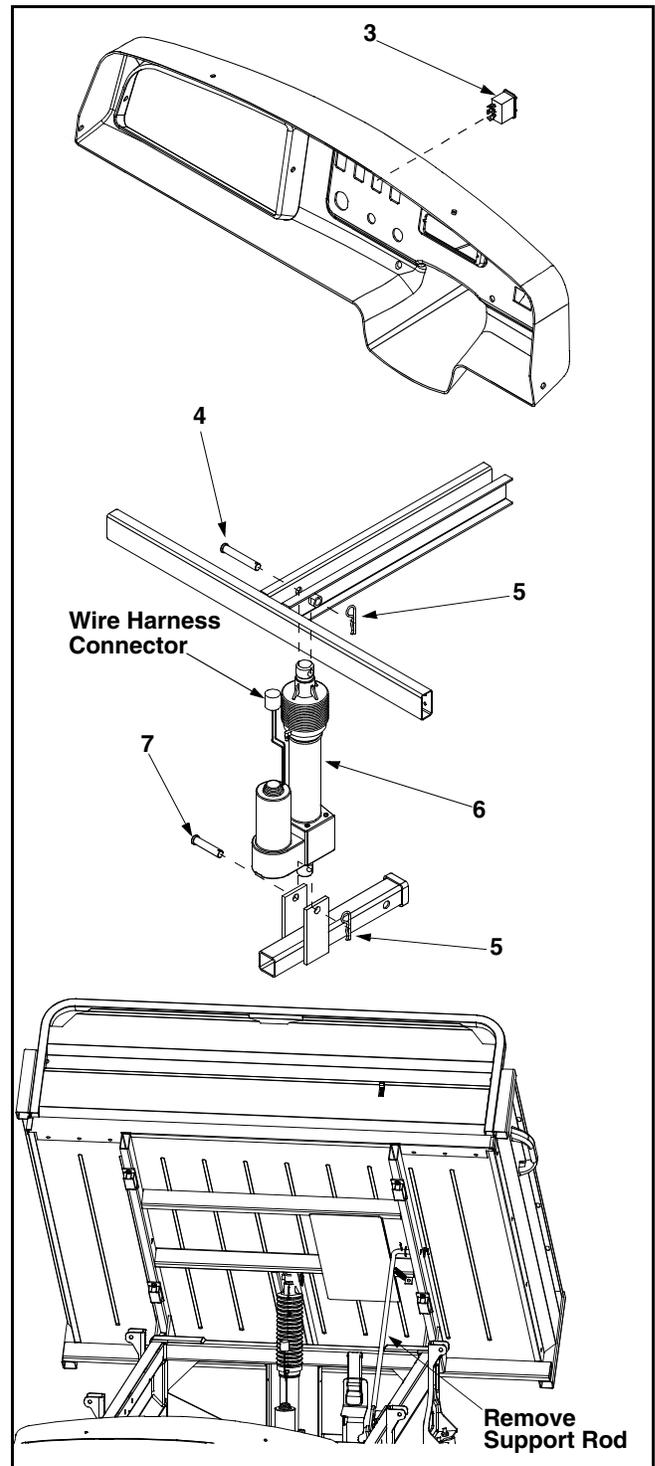

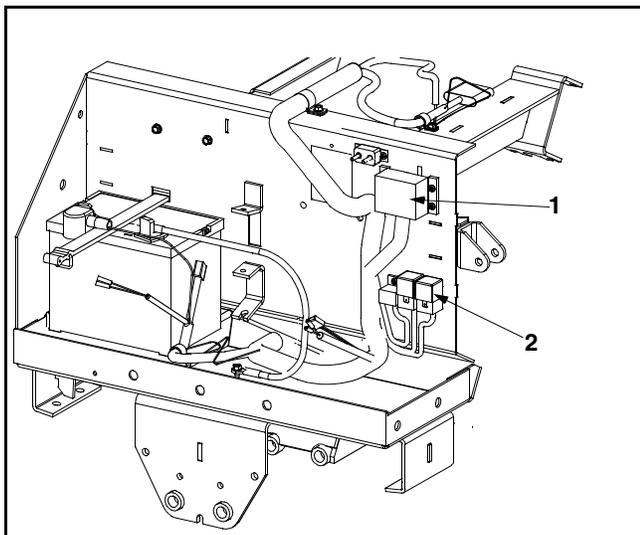

NOTE: The support rod bracket can remain in place.

- Install the two relays to the wire harness, which is located under the fuse block. See Illustrated Parts.
- Plug 30A fuse into the last slot on the right (in the top row) of the fuse block.
- Lower hood and secure hood to vehicle.
