

Tribute[®]
TOTAL

Product

information sheet

- // **Active Ingredient:** Foramsulfuron, Thiencarbazone-Methyl, Halosulfuron
- // **Formulation:** Water Dispersible Granule
- // **WSSA Group:** 2
- // **Signal Word:** Caution

Best Uses

- // Selective, postemergence herbicide for broad-spectrum control of weeds growing in well-established bermudagrass and zoysiagrass
- // Controls annual and perennial grassy weeds, sedges, kyllinga and 55 types of broadleaf weeds
- // Transition aid for the removal of cool-season grasses from bermudagrass

Attributes of Tribute[®] Total

- // Control of wide variety of hard-to-control weeds in one product
- // Weed growth is inhibited within hours after application, yet visible symptoms typically require one or more weeks before becoming evident
- // The weed is usually fully controlled within 1-4 weeks after treatment
- // The speed of symptom development will be faster at warmer temperatures

How To Apply

Tribute Total can be used as a broadcast application or as a spot treatment.

Broadcast Applications

- // Mix a minimum of 10 gallons of water per acre // Use a spray adjuvant to achieve effective weed control

Spot Treatments

- // Efficient for controlling individual weeds and/or small areas of weeds
- // To make a spot treatment, mix 0.023-0.073 oz. of Tribute Total per gallon of water and add spray adjuvant
- // Spray weeds until wet
- // Spot treatments may cause temporary yellowing and growth regulation effects on the turfgrass
- // For spot treatments, treat no more than 10,000 sq. ft. per acre

Dollarweed

Key Strengths

- // Controls existing weeds in many warm-season turf species
- // Control of dollarweed, doveweed, Virginia buttonweed and other broadleaf weeds

////// Weeds Controlled

Annual bluegrass

Tropical signalgrass

Doveweed

Dallisgrass

Yellow nutsedge
