

PROFESSIONAL PEST MANAGEMENT

POWERFUL RODENT CONTROL THAT RUNS IN THE FAMILY

Talon® brand rodenticides from Syngenta
provide trusted, effective rodent control.

FOR LIFE UNINTERRUPTED™

syngenta®

The History of *Brodifacoum*

In the latter half of the 20th century, rodents began developing resistance to the popular anticoagulant *warfarin*, putting Pest Management Professionals (PMPs) across the country in a rodent control conundrum. To address this, *brodifacoum* was launched in the pest control market, which introduced a new generation of anticoagulant rodenticides.

Over the years, *brodifacoum* has been quickly adopted by PMPs for its impressive rodent control results. Syngenta is proud to offer two *brodifacoum*-based products, Talon Weatherblok® XT rodenticide and Talon-G rodenticide, which deliver outstanding performance against rats and mice with the following features:

- ▶ **Efficacy:** palatable formulations and single-feeding properties help prevent bait shyness
- ▶ **Flexibility:** labeled for use in and around urban and non-urban structures
- ▶ **Convenience:** available in block and mini-pellet formulations

Outstanding Weather Resistance and Rodent Acceptance

It's important for a rodenticide bait block to achieve a balance between acceptance and durability. That's why Talon Weatherblok XT rodenticide is designed to be highly attractive to rodents while still being resilient in all types of weather.

Key Features

- ▶ Contains high-density grain content that is palatable to rodents
- ▶ Designed for extreme weatherability without compromising rodent acceptance
- ▶ Comprised of wax blocks with grooved edges for more gnawing area
- ▶ Contains Bitrex®, a human taste deterrent

Key Benefits

- ▶ Allows for rodent control at a low dose, even *warfarin*-resistant mice and rats
- ▶ Flexible label allows use in and around urban and non-urban structures
- ▶ Is highly attractive to rodents and limits the incidence of bait shyness
- ▶ Single-feeding properties reduce cost and exposure to lessen hazards to users

Packaging to Fit Your Needs

For added convenience, Talon Weatherblok XT is offered in two packaging configurations:

- ▶ An individual 16-lb. pail
- ▶ A pallet containing 12 16-lb. pails for high-volume needs*

*Payments on the Talon Weatherblok XT pallet can be deferred with SummerPay™ terms. Visit www.PestPartners365.com for more information.

Unique Design for Enhanced Performance

Talon-G rodenticide maintains one of the highest acceptance rates among rodenticides. Its unique mini-pellet design is highly attractive to rodents, especially mice.

Key Features

- ▶ Mini-pellet formulation is made of a high-quality, palatable grain base
- ▶ Bait packs allow scent to filter out but keep moisture from coming in, maximizing freshness
- ▶ Contains Bitrex, a human taste deterrent

FOR LIFE UNINTERRUPTED™

@SyngentaPest

Key Benefits

- ▶ Helps reduce bait shyness to control rodents with a single dose, even *warfarin*-resistant rats and mice
- ▶ Poses minimal risk to non-target organisms when placed in tamper-proof bait stations, as directed by the label
- ▶ Can be used indoors and outdoors in urban and non-urban areas

Extended Use for Added Flexibility

Talon-G is packaged in a 16-lb. box containing two 8-lb. pails. When kept dry and free of contamination in its original packaging, the product will remain stable for at least two years.

With the proven power of *brodifacoum*, you can trust Talon rodenticides to provide rodent-free conditions in your customers' homes and on their properties. For more information about Syngenta rodent control solutions, visit www.SyngentaPMP.com.
