

LESCO®

Drax™ Fungicide

PRODUCT OVERVIEW

LESCO Drax™ is a preventive contact fungicide for golf course use that provides control of multiple diseases, including dollar spot, brown patch and leaf spot. The active ingredient, Fluazinam, is the only turf fungicide Classified by FRAC in Group 29. This unique class of chemistry, along with its multi-site mode of action, translates to minimal risk of fungicide resistance. When partnered with Chlorothalonil (LESCO Manicure) based fungicides, it provides season long contact protection.

FEATURES AND BENEFITS

- Contains 4.17 pounds of fluazinam per gallon.
- Unique multi-site contact active ingredient, with no known resistance.
- Excellent control of dollar spot
- Effective against Leaf Spot, Brown Blight, Brown Patch, Anthracnose, Gray & Pink Snow Mold and other listed diseases
- Label allows for 12 applications per year.
- Only for use on golf course greens, tees, fairways, and roughs

PRODUCT USE DIRECTION

This product is a broad-spectrum fungicide for use to control diseases of turf grasses on golf courses only. This product may be applied with all types of spray equipment normally used for ground applications on golf courses. Apply this product in sufficient water to obtain adequate uniform coverage of the turf. Apply in a minimum spray volume of 50 gal of water per acre. Please see label for detailed product use restrictions and directions.
