

LESCO® CharZorb

Flowable Activated Charcoal

PRODUCT INFORMATION

LESCO CharZorb is a finely ground, flowable activated charcoal. It can be used to reduce the available level of most organic pesticide residues in the soil.

CharZorb does not deactivate inorganic pesticides such as compounds of arsenic (MSMA, DSMA), lead, sodium chlorate, sulfur, borax, etc.

CharZorb can also be used to reduce plant damage from petroleum product spills, such as hydraulic oil.

DIRECTIONS FOR USE

- Shake vigorously for 1-2 minutes.
- Fill tank at least ½ full of water before adding CharZorb.
- Keep solution agitated during use.
- Remove fine screens from spray filters and nozzles prior to use.
- Empty sprayer completely and rinse well.
- DO NOT ALLOW PRODUCT TO SIT IN SPRAYER WITHOUT AGITATION.
- Slight discoloration may occur in some sprayers.

APPLICATION RATES

Organic pesticides: Apply 32-64 ounces of CharZorb in sufficient water for adequate distribution per 1,000 square feet. Grass areas should be washed free of heavy charcoal deposits. Treated areas should be watered thoroughly and may be seeded 24 hours following application.

Spills: Apply 32-64 ounces per 1,000 square feet of contaminated area. For severe spills, apply CharZorb at full strength and wash into soil and root zone 4-6 inches deep.

Spray tank cleaner: First clean tank with LESCOSol and rinse thoroughly (follow application directions). Then refill tank half full with water. Add ½ gallon of CharZorb per 50 gallons of water. Fill remainder of tank with water. Circulate for 10 minutes and empty tank by spraying through boom, nozzles or spray gun.
