

# FINE-GRADE GYPSUM (GRANULATED – 80 SGN)

**Application:**

Recommended for turf, landscape, lawn and garden and soil amendment applications.

**Chemical Name:**

Calcium Sulfate Dihydrate (CaSO<sub>4</sub>·2H<sub>2</sub>O)

**Common Names:**

Gypsum

Calcium Sulfate

**Properties:**

Appearance: Granulated, Gray

Bulk Density: 65-70 lb/cu ft

Moisture: <0.5%

pH: 6.4

**Guaranteed Analysis:**

Calcium (Ca) ..... 22%

Sulfur (S) ..... 18%

18% Combined Sulfur (S)

Calcium Sulfate Dihydrate ..... 96%

Binding Agent: Lignin Sulfonate (3%)

**Product Size and Distribution Profile:**

US Std	Tyler	mm	Cumulative Retained, %	Cumulative Passing, %
16	14	1.18	14	86
18	16	1.00	37	63
20	20	0.85	57	43
25	24	0.71	76	24
30	28	0.60	86	14
40	35	0.425	100	0

**Benefits:**

- Highest purity gypsum available
- Highly available source of nutrients - Ca and S
- Improves water penetration and retention
- 200X more soluble than limestone
- Ca and S rapidly penetrates the soil and is readily taken-up by the plant
- Improves soil structure/no effect on pH
- A source of S that doesn't burn plants
- Remediate degraded soils and soils high in Na, Al, Mg, salts and bicarbonates
