SEAWEED EXTRACT

NutriSolve™

A BIOPRO MICRONUTRIENT BLEND

Benefits of Use:

- Balanced supply of micronutrients (B, Cu, Fe, Mn, Mo, Zn)
- Rapid response from foliar uptake
- Increased nutrient uptake from organic acids
- Increased turf vigor
- Enhanced color without additional nitrogen
- Improves overall turf and plant quality
- More vibrant foliage

Problems Addressed

- Wide range of micronutrient deficiency symptoms
- Sand based systems where micronutrients are inherently low
- Lack of nutrient availability due to extremes in soil pH

NutriSolve with SeaXtra is a complete blend of micronutrients formulated in the same ratio as they occur naturally in the plant. It is chelated with a combination of citric and other organic acids, which stabilize nutrients and enhance their uptake. NutriSolve is designed as a foliar spray to correct or prevent a range of micronutrient deficiencies without the addition of nitrogen. It is an excellent product for sand based systems with low CEC's and nutrient holding capacity. NutriSolve has also been engineered to address the lack of nutrient availability associated with pH extremes.

NutriSolve™

Application Instructions:

NutriSolve can be applied through fertigation, foliar spray, soil drench, or deep root injection. It can be applied alone or tank mixed with other products. Shake well before using.

Greens and Tees:

Apply 6 oz. of NutriSolve diluted in 1 gallon water per 1,000 sq. ft. (2 gallons in 40 gallons of water per acre) every two weeks. To maximize performance, rates may be split into weekly applications.

Fairways, Lawns, Athletic Fields and Other Turf:

Apply 6 to 12 oz. of NutriSolve diluted in 1 gallon of water per 1,000 sq. ft. (2 to 4 gallons in 40 gallons of water per acre) per month. To maximize performance, rates may be split into weekly or bi-weekly applications.

Ornamental Shrubs and Evergreens:

Mix 2 gallons of NutriSolve in 100 gallons of water and spray foliage to the point of runoff. Best results will occur when applied to actively growing foliage during periods of high humidity and low plant stress (early mornings, late afternoons and cloudy days are preferable to hot, dry conditions).

Trees and Palms:

Mix 1 pint to 1 quart of NutriSolve in 100 gallons of water. Apply 5 gallons of finished solution per inch DBH (Diameter at Breast Height). The solution may be applied through deep root injection or soil drench.

Note:

6 oz. of NutriSolve per 1,000 sq. ft. per month will provide the monthly maintenance rate of SeaXtra Seaweed Extract. Higher application rates will provide additional SeaXtra benefits.

Compatibility:

Perform a standard "jar test" to check compatibility with other products before mixing.

WARNING

CAUSES SERIOUS EYE IRRITATION. CAUSES SKIN IRRITATION.
HARMFUL IF SWALLOWED.

PRECAUTIONARY STATEMENTS: Keep out of reach of children. Read label before use. If medical advice is needed, have product container or label at hand. Avoid breathing mist or spray. Use only outdoors or in a well ventilated area. Do not get in eyes, on skin or on clothing. Wear protective gloves, protective clothing, eye protection, face protection, and other personal protective equipment as required. Wash contaminated clothing before reuse.

FIRST AID: IF SWALLOWED: Rinse mouth and call a poison center. **IF INHALED:** Remove person to fresh air and keep comfortable for breathing. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and able to do so. Continue rinsing eyes. Seek medical attention if eye irritation persists. **IF ON SKIN:** Rinse skin with water or shower.

STORAGE & DISPOSAL: Store between 40°-120°F. Avoid direct heat or fire. Decomposition may occur at high temperatures. Avoid freezing. Dispose of contents/container in accordance with local/regional/national and international regulations.

Refer to product SDS for additional safety instructions.
