## GENERAL INFORMATION

LESCO® Spreader Sticker is a high quality, general purpose nonionic surfactant that can be used with most insecticides, fungicides, herbicides and wettable powders. LESCO Spreader Sticker improves performance of active spray ingredients by giving them more uniform distribution and better wetting of the plant surface.

- Lower surface tension of the tank mix allows spray droplets to spread upon contact
  - Increased contact area drives pesticide actives into the plant faster
  - Allows water to penetrate hydrophobic surfaces, ensuring delivery of actives
- LESCO Spreader Sticker meets pesticide label requirements for an 80/20 surfactant

## DIRECTIONS FOR USE (NOT FOR AQUATIC USE)

Follow the instructions on all pesticide labels. The user must either have previous experience with the specific tank mix being used or must conduct phytotoxicity tests and a jar test with the specific tank mix in order to determine product compatibility.

Although LESCO Spreader Sticker may usually be added almost anytime during the mixing process, it is strongly recommended that it be added after all other tank mix additives and actives are added. Certainly, any solid formulations must be added and thoroughly mixed into the tank water before adding this or any other liquid products to the tank.

Add LESCO Spreader Sticker as a surfactant last before the final addition of water in the recommended level in the chart below.
