TIGER 90CR® Sulphur – Granular Sulphur Fertilizer –

PRODUCT DESCRIPTION

TIGER 90CR® Sulphur is a high analysis granular degradable sulphur product that can be used both as a source of plant nutrient sulphur and/or as a soil amendment for correction of problem alkali soils. Yearly applications of **TIGER 90CR Sulphur** will improve soil sulphur levels as well as loss associated with nutrients that are soluble.

TIGER 90CR Sulphur is a unique, high analysis sulphur fertilizer that delivers agronomically and economically, and provides excellent handling characteristics.

GUARANTEED ANALYSIS – 90% Sulphur

PHYSICAL PROPERTIES

Color	Pale Copper Pastilles			
Fertilizer Prill Size	Regular Grade – 260 SGN		Mini Prill Grade – 190 SGN	
Angle Of Repose	29 Degrees			
Breakage Tests (% Fines Produced)	<0.5%			
Impact (SLI)	0.9%			
Abrasion (SLII)	0.7%			
Bulk Density (Unpacked*)	Regular Grade – 68.5 lbs/ft ³		Mini Prill Turf Grade – 88 lbs/ft ³	
Package Sizing	Canada (Irricana Facility)		USA (Atmore & Stockton Facility)	
	25kg bags	1000kg MBB	50 lb bags	2000 lb MBB
	Bulk Truck		Bulk Truck & Bulk Train (Atmore Only)	

* Packed material will be slightly more dense.

GENERAL APPLICATION AND USE RECOMMENDATIONS

TIGER 90CR Sulphur, when used as a part of a balanced fertility program, can provide a season-long source of sulphur. **TIGER 90CR Sulphur** can be applied alone or blended with granular fertilizers. Amount required should be based on agronomic recommendations from soil tests.

Recommendations should also be based on crop removal rates of sulphur.

SPECIFICATIONS

TIGER 90CR SULPHUR SPECIFICATIONS

If **TIGER 90CR Sulphur** is not applied regularly as part of a fertilizer program, or if soil sulphur levels are deficient, then soluble sulphate should be applied to high sulphur-using crops such as oil seeds and legumes. *Under no circumstances should TIGER 90CR Sulphur be applied alone to sulphur deficient soil unless the application rate applied is adequate enough to overcome the sulphur deficiency. In Northern soils, TIGER-SUL recommends an application of a combination of sulphate and sulphur to assist with the building of sulphur reserves in these soils. Consult an agronomic specialist in these rare cases.*

For more information on **TIGER 90CR Sulphur** view the "**TIGER 90CR Sulphur Advantage**" in our Sulphur Technical information.

For information on **Soil Amending** see our "**TIGER 90CR Sulphur Recommendations sheet**."

HANDLING AND STORAGE

TIGER 90CR Sulphur, will blend and store well with other granular fertilizer products. Accepted blending and handling procedures should be followed when using **TIGER 90CR Sulphur**. Good housekeeping is necessary when handling sulphur products. TIGER-SUL Products uses a special anti-dust agent to minimize air borne dust. Always use stringent dust control procedures to prevent concentrated flammable dusts from reaching a spark or flame source. Sulphur materials should not be blended and stored with strong oxidizing agents such as ammonium nitrate. Avoid extensive use of augers due to fracturing of the product.

FIRST AID

SKIN CONTACT: Wash with mild soap and water.

EYES: Irrigate thoroughly with copious quantities of plain water. Inadequate irrigation may result in irritation. Do not use Boric Acid.

INGESTION: Irritation may occur, seek medical attention.

INHALATION: Remove to fresh air environment. Seek medical attention.
