

LESCO®

LESCOFlo™ Ultra Granular

Superior Non-Ionic Wetting Agent for Turf and Ornamentals

Ingredients:

Blend of Non-ionic Surfactants.....15%
Inert ingredients.....85%

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

PRECAUTIONARY STATEMENTS

CAUTION: Avoid contact with eyes, skin and clothing. Use proper hygiene when handling.

STATEMENT OF PRACTICAL TREATMENT

- Product causes eye irritation unless flushed immediately with water for 15 minutes. Seek medical attention.
- Do not take internally. If ingested, call a physician or poison control center immediately.
- Avoid breathing vapor or spray. If inhaled, move user to fresh air and seek medical attention.
- If on skin, wash with soap and water. Remove contaminated clothing. If irritation persists, seek medical attention.

DIRECTIONS FOR USE

LESCOFlo™ Ultra Granular works best when applied early in the growing season prior to moisture stress. However, it can also be used curatively to relieve plant stress due to hydrophobic soils any time during the year. Since LESCOFlo™ Ultra Granular does not dissipate rapidly in the soil, only 1 or 2 applications will be necessary during the growing season.

Application can be accomplished with a rotary fertilizer spreader. LESCOFlo™ Ultra Granular must be applied to dry foliage and watered in immediately with a minimum of 1/4" of water after application to wash particles off the grass leaf blades and to release the active ingredients into the soil.

Immediate watering will enhance soil activation due to the low solubility characteristics of the active ingredients which are responsible for the extended residual activity.

CAUTION:

Keep out of reach of children. Users are cautioned to take reasonable safety precautions when handling and applying this product. Do not use on food crops destined for human or animal consumption.

GENERAL DESCRIPTION

LESCOFlo™ Ultra Granular is an improved formulation of a spreadable 15% active nonionic wetting agent which has been shown to last up to a full growing season when using a single high rate of application. This product helps to alleviate problems associated with localized dry spot (LDS) from hydrophobic soils in turf and ornamental areas. LESCOFlo™ Ultra Granular also increases the rate and depth of water penetration and helps to reduce subsequent irrigation requirements. LESCOFlo™ Ultra Granular can be applied to help reduce moisture stress on all turfgrass areas, including golf course tees, greens, fairways, athletic fields, residential and commercial lawns, sod farms, cemeteries, parks and any other general use turfgrass areas. LESCOFlo™ Ultra Granular can also be used on newly seeded, sodded, sprigged, plugged, or hydroseeded turfgrass or when planting ornamental trees, shrubs or flowers to reduce irrigation or watering needs.

APPLICATION RATES

LESCOFlo™ Ultra Granular application rates are 3.5 - 7.0 lbs per 1,000 sq. ft. When using the high rate of 7 lbs/1,000 sq. ft., only one application throughout the growing season may be necessary. Although burn potential is lower than most wetting agents/surfactants, application during the coolest part of the day is recommended.

TO AVOID DISCOLORATION, LESCOFlo™ Ultra Granular MUST BE APPLIED TO DRY FOLIAGE AND WATERED IN IMMEDIATELY WITH AT LEAST 1/4" OF IRRIGATION.

SPREADER SETTINGS

Use only with rotary spreaders	3.5 lbs	7.0 lbs
LESCO calibration gauge#	11	15

These spreader settings are only approximate. Application speed, age and condition of spreader can cause wide variation. Be sure to calibrate your spreader before application.

WARRANTY

LESCO, Inc. warrants that this product conforms to the analysis on its label. When used in accordance with label directions, under normal conditions, this product is reasonably fit for its intended purposes. Since time, method of application, weather, plant and soil conditions, mixture with other chemicals, and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably foreseeable. The user assumes all risks of any such use.
