

Contains Microbes and Citrus Oil

InVade™

bio drain

Drain Treatment Gel • 32 Applications

Directions for Use

InVade Bio Drain contains microbes that eliminate odors and eat through scum where flies can breed, and citrus oil for extra power. Moisten drain with warm water (1-2 gal) before treatment if not used regularly and apply at low drain usage times of the day. Apply 4 oz to each drain around the edges to coat the sides. Repeat daily for 5-7 days and then every 1-2 weeks for ongoing maintenance. For drains that have a very heavy layer of scum, for immediate results, clean the drain with a brush before beginning treatment and then maintain with InVade Bio Drain to prevent further build-up. May also be used in soda fountain drip trays to prevent or minimize “sugar snake”.

CAUTION: Keep out of reach of children. May be harmful if swallowed - seek medical attention and do not induce vomiting. Avoid contact with skin and eyes. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for persistent irritation. Store in a closed, appropriately labeled container between 40 and 90 °F.
