

Brushmaster®

HERBICIDE

Superior brush control year-round

WHAT IT IS

Brushmaster® Herbicide provides economical and dependable control of the toughest brush, including multiflora rose, brambles, poison ivy, poison oak, kudzu, and many other listed vines, trees, and broadleaf weeds. A low-volatile ester Trimec® herbicide complex formulation, Brushmaster offers application flexibility and can be applied almost any time of year. It's ideal for use on fencerows, roadsides, firebreaks, around farmstead buildings, and other non-cropland areas as listed.
