# Lights out, bed bugs.

Bedlam turns bed bugs into dead bugs.

# Kill Bed Bugs where they hide and get lasting control you can count on

Bedlam® controls Bed Bugs, Dust Mites, Fleas, Lice and Ticks by killing on contact and providing lasting residual performance. Bedlam is labeled for use in the toughest hiding places. As a water-based product, it won't stain water-safe fabrics and it is non-irritating to humans and animals. Bedlam works for the most demanding jobs—rest assured.

## CONVENIENT AEROSOL SPRAY

- Broad label for flexible use
- Kills on contact, with residual control
- Non-irritating, non-staining water-based formula\*

\* If you are unsure if the fabric or surface is water-safe, spray an inconspicuous area to test for possible staining or discoloration.

## Effective bed bug application

For best results, in addition to treatment with Bedlam® Insecticide, pest control professionals should include additional tactics such as those listed below.

- Conduct a thorough inspection to locate the infestation. Be certain to look in harborages that offer the bed bug isolation and darkness.
- Reduce and remove clutter from the room
- Dispose of infested items that can be discarded
- Encase or bag articles that may be infested, but will not be laundered or discarded
- Remove bedding, clothing and other items that may be laundered or dry cleaned. Wash and dry on "high heat" dryer setting to achieve a temperature of 185°F.

## Broad usage

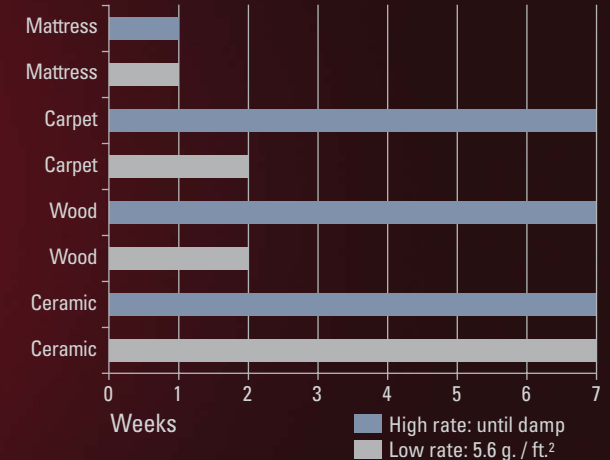

Bedlam® Insecticide aerosol is effective as both a surface spray or as a crack and crevice treatment in hard-to-reach areas of non-food indoor areas, including:

<b>Apartments</b>	<b>Kennels</b>	<b>Restaurants</b>
<b>Homes</b>	<b>Motels</b>	<b>Schools</b>
<b>Hospitals</b>	<b>Nursing Homes</b>	<b>Warehouses</b>
<b>Hotels</b>	<b>Offices</b>	

## Speed of knockdown

## Residual Efficacy

## Maximum performance

For listed insects, use Bedlam Insecticide as a component of an Integrated Pest Management (IPM) Program in combination with other products such as NyGuard® IGR Concentrate or Onslaught™ Microencapsulated Insecticide (unless expressly prohibited by the product label).

## Insects controlled

<b>Bed Bugs</b>	<b>Fleas</b>	<b>Ticks</b>
<b>Dust Mites</b>	<b>Lice</b>
