Supplemental Label

TRIBUTE™ TOTAL

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Read this label and the product package label before using this product. This Supplemental Label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the product label for TRIBUTE TOTAL attached to the container.

USE DIRECTIONS FOR SPECIFIC CROPS

SPOT TREATMENTS

Spot Treatments are for controlling individual weeds and/or small areas of weeds. To make a Spot Treatment, mix 0.023 oz. – 0.073 oz of TRIBUTE TOTAL per gallon of water and add appropriate spray adjuvant(s). Spray weeds until wet but avoid spray solution runoff and over application. Spot treatments are likely to cause yellowing and growth regulatory effects to the turfgrass. For spot treatments, treat no more than 10,000 sq. ft. per acre.

SEEDING AND SPRIGGING INTERVALS

Perennial and annual ryegrass – Do not apply TRIBUTE TOTAL within 8 weeks prior to overseeding. If applications are made within this window, a reduced stand will occur.

Seeded Bermudagrass– TRIBUTE TOTAL may be applied to bermudagrass up to 3 months [90 days] prior to seeding without a significant reduction in stand. For newly established stands of bermudagrass, do not apply TRIBUTE TOTAL for at least one month [4 weeks] after emergence since injury may result.

Sprigged / Sodded Bermudagrass– TRIBUTE TOTAL may be applied no sooner than 2 weeks after sprigging or sodding without a significant reduction in quality.
