

# Operation Indicator

## Operational Indicator Kit for Drip Irrigation

Rain Bird Drip System Operation Indicator Kit provides a quick visual assurance that your drip irrigation system is running, which is especially valuable with a subsurface installation. When your drip system reaches 15 PSI (1,0 bar), the pop-up indicator rises 6" (15 cm) to provide a clear visual indication that the zone is on and water is flowing. When the system is off, the pop-up indicator retracts to become hidden by lowering safely and securely back into the operational indicator body.

### Visual Indication

When the drip irrigation zone is running, a pop-up indicator rises to expose a bright colored cap or a spraying nozzle.

### Potable or Non-Potable

Operational Indicator Kit includes three different indication caps: potable, non-potable, or an adjustable spray nozzle.

### Long Lasting

When not in use, the stem retracts flush into the body to hide and protect the indicator

# Operational Indicator

## Indicates when the Drip Irrigation Zone is Running

- Indicator pops up as a visual notification that the drip irrigation zone is running and retracts when the system is off
- Stem rises 6" (15 cm) with a colored cap or spray nozzle for clear visibility
- Indicates drip irrigation zone operation as low as 15 PSI (1,0 bar)
- Ideal for densely planted sites or drip irrigation for turf

## Multiple Indication Options

- Yellow 4-VAN (Variable Arc Spray Nozzle) can be adjusted to allow for a visual spray indication or no flow. The 4-VAN spray nozzle has a 3 to 4 ft. (0,9 to 1,2 m) spray range.
- Wetting pattern of spray nozzle can also be used as additional indication that system is running or has been run recently
- A bright yellow cap for an operational indicator that doesn't need spray indication
- A purple cap to indicate non-potable water is used in the drip irrigation zone

## Long Lasting

- When not in use, the stem retracts flush into the body to hide and protect the indicator
- Operating Pressure: 15 to 60 PSI (1,0 to 4,1 bar)
- Constructed with UV resistant, high impact plastic
- Includes 16" of durable 1/4" distribution tubing with self piercing connection fitting pre-installed

## Model

- Model # OPERIND
- Includes: Operational Indicator with 4-VAN nozzle and 16" of 1/4" distribution tubing with connection fitting pre-assembled, yellow cap, and purple cap.
