

Emerald Isle Solutions™

CPR®

4•0•1 Turf Fertilizer with Iron

Guaranteed Analysis

Total Nitrogen (N)	4.00%
1.10% Nitrate Nitrogen	
2.90% Urea Nitrogen	
Soluble Potash (K₂O)	1.00%
Magnesium (Mg)	0.53%
0.53% Water Soluble Magnesium (Mg)	
Sulfur (S)	1.00%
1.00% Combined Sulfur (S)	
Iron (Fe)	2.00%
2.00% Chelated Iron (Fe)	
Manganese (Mn)	0.25%
0.25% Chelated Manganese (Mn)	
Zinc (Zn)	0.20%
0.20% Chelated Zinc (Zn)	

Derived from: Magnesium Sulfate, Magnesium Nitrate, Zinc Nitrate, Urea, Potassium Hydroxide, Iron EDTA, Iron Citrate, Zinc EDTA, Zinc Citrate, Manganese EDTA, Manganese Citrate and Kelp Extract.

ALSO CONTAINS NON-PLANT FOOD INGREDIENT:

2% Glucoethers (Surfactant)

9.46 Liters
(2.5 U.S. Gallons)

Net Weight: 11.07 Kg.
(24.39 lbs.)

CPR®

4•0•1 • Turf Fertilizer with Iron

CPR is a blend of our proprietary formulas containing kelp extracts, micro-nutrients and a surfactant.

Application Guidelines

Shake or agitate before use. Rates will vary based on soil/tissue analysis and your agronomic needs. Apply in the early morning or late afternoon for best results. Use a spray adjuvant for superior coverage.

Allow foliar product to dry on plant prior to irrigation.

Apply 177-266 ml. per 93 sq. meters (6-9 oz. per 1000 sq. ft.) every fourteen days. For fairways, apply at the higher rate.

FOR FLORIDA:

We recommend that you follow the Golf Course BMP's at: <http://www.dep.state.fl.us/water/nonpoint/docs/nonpoint/glbmp07.pdf>

Mixing Guidelines: Use a minimum of 3.8 liters of water carrier per 93 sq. meters (1 U.S. gallon per 1,000 sq. ft.). Fill mix tank with half of required spray water and turn on agitation. Measure product into tank, add remaining water and other soluble materials. Add a defoaming agent if desired, and adjust pH of tank-mix to neutral if necessary.

Compatibility: Emerald Isle liquids and True Foliars are concentrated materials. They are compatible with most fertilizers and chemicals but

should not be mixed directly with other chemicals. They should be mixed in spray tanks with water and proper agitation. Conduct a jar test as needed to ensure compatibility with other products before tank mixing.

For 1 lb. of N per 1,000 sq. ft., apply 6 oz of CPR and 6 oz of True Foliar N nine times over the course of the season.

Storage and Use Guidelines

Store in original containers at temperatures between 10°C and 35°C (50°F and 90°F). Mix with other materials only at time of application and in exact amounts required. To avoid contamination, do not return previously mixed product to its original container. Use all product within 12 months of original purchase date.

CAUTION!

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. May cause irritation. Avoid contact with eyes, skin, and clothing. Wear chemical resistant goggles and gloves. Do not take internally. Avoid inhaling mist or vapor. In case of contact with eyes, flush eyes with water for 15 minutes. If irritation occurs, seek medical attention.

Foliar fertilization is intended as a supplement to a regular fertilization program and may not, by itself, provide all the

nutrients normally required by crops or other intended plants during the course of the year.
