

MACRON™ FERTILIZERS

Premium soluble concentrates

MACRON™ 16-32-16

Bloom Starter Formula. Designed for use with new seeds, plantings and transplants, as well as other situations that require a high phosphorus fertilizer.

MACRON™ 20-20-20

All Purpose Formula. For use in most growing conditions that require a balanced 1:1:1 ratio fertilizer. Formulated to provide application flexibility and all-around versatility.

MACRON™ 23-0-23

Stress Preventer Formula. Designed to be used for pre-stress conditioning, during periods of plant stress and other situations that require fertilizer with equal nitrogen/potassium ratios.

MACRON™ 28-7-14

Plant Growth Formula. Formulated for conditions that require a complete fertilizer with an approximately 4:1:2 ratio for optimum turf growth.

012728	MacroN™ 28-7-14 25-pound Pail

LESCO® TREE & PALM STAKES

Fast and efficient! Our tree and palm stakes are a complete micronutrient fertilizer compressed into a form that is easy to pound into the ground around trees and shrubs. Each stake provides a measured amount of fertilizer— simply use the appropriate number of stakes for the size of the plant. Palm Stakes also work great on tropical ornamentals.

510512	LESCO Turfgrass Growth Supplement 0-0-10 + 5% Si

NITROGEN STABILIZER

LESCO U-PLUS Nitrogen stabilizer is a uniquely formulated nitrogen additive for urea and UAN (Urea Ammonium Nitrate) fertilizers. Benefits include:

- Enhances the efficiency of melted urea and UAN solutions.
- Minimizes urea nitrogen volatilization and nitrate nitrogen leaching.
- Handy 25 lb. resealable container with handy measuring scoop.
