FOLIAR FERTILIZER

TREES & SHRUBS

1 gallon jugs, 4 jug case, bulk

Mirimichi Pro Foliar Fertilizer/Trees & Shrubs is specifically formulated to help trees and shrubs thrive. The liquid solution contains an ideal balance of nitrogen, phosphorus and potassium distilled to 400 Dalton size (the smallest size on the market) so plants can immediately absorb their benefits through roots as well as leaf structure. Pro Foliar Fertilizer resists photochemical breakdown from the sun's rays and maintains a neutral charge, preventing unwanted reactions with other chemicals. Spray Pro Foliar Fertilizer directly onto foliage, drench plants or inject into the root zone; whatever method you use, you can know you are delivering complete, targeted nutrition with minimal waste.
