

EZ FLO Surfactant and Penetrent for Water Reduction - 1 gal jug

ACTIVE INGREDIENTS:	
8.5%.....	Carboxylic Acids
17.0%.....	Nonionic surfactants
INERT INGREDIENTS:	
74.5%.....	Water
All ingredients are exempt from tolerance under 40 CFR 180	

Features / Benefits

- 1 gal jug - Surfactant and Penetrent for Water Reduction
- Surfactant that can mix with all FERTI-MAXX products and/or fertilizer blend
- Frees calcium allowing nutrients to penetrate the full soil profile
- Provides consistent moisture penetration and reduces water runoff
- Low application rate of 32 oz per acre

Directions for Use

- HYDRO-MAXX is safe throughout the entire growing season. For best results, apply before signs of stress or circumstances that decrease moisture penetration.
- HYDRO-MAXX can be added to any FERTI-MAXX fertility product and most other fertilizers.
- Do not mix with calcium.
- To increase performance in hard and/or poor water quality, use HYDRO-MAXX more often at lower rates.
- Different conditions such as water quality, weather, and soil type/quality will affect the application frequency and amount of product needed to achieve optimum results.

Application Rates / Intervals

- Fertigation Systems: For best results, start with 32 ounces of HYDRO-MAXX per acre distributed evenly over a 4-week period. If water penetration is still low, increase use rate by 8 ounces per acre. Repeat usage rate increase until desired water penetration is achieved. Repeat as necessary
- Foliar Applications: Apply 1 to 3 ounces in a minimum of 2 gallons of water per 1,000 square feet every 3 to 4 weeks. Apply only as directed.
- Questions and Information about the components of this product lot may be obtained at www.ezflofertilizing.com or by phone 866.393.5601

Precautionary Statements

Wash skin thoroughly after handling. Get medical advice/attention if you feel unwell. Dispose of contents/container in accordance with local, regional, national or international regulations
