Safer for
plants, people
and pets!

ICE B'GONE MAGIC®

High Performance Ice Melt

Performs to -35
Degrees Surface
Temperature

More effective than rock
salt or calcium chloride
Melts black ice and hard
packed snow

Corrosion Protection

90% less corrosive than
rock salt
Less harmful to walkway
and driveway surfaces
Will not clump or cake

Environmentally
Friendlier

Apply 35-50% less ice melter
Designated by the EPA as
"Design for the Environment"

Pet Friendlier

Biodegradable and
water soluble

Made in the USA

50 lbs (22.7 kg)

Ice B'Gone Magic is a unique blend of sodium chloride and a patented high performance agriculturally enhanced liquid de-icing agent. Ice B'Gone Magic has unique coloring enabling you to see where the product has been applied and helps prevent over application.

DIRECTIONS FOR USE: For best results, remove all loose snow and slush from driveways, steps and walkways. For driveways and walkways, use 1/4 - 1/3 cup of Ice B'Gone Magic per square yard. Spread a generous amount in path areas. Melting will begin almost immediately and continue for longer than ordinary rock salt products. Thick accumulations of ice may require additional applications. Keep package closed when not in use.

WARNING: Over time, ice melting agents may be harmful when extensively or repeatedly applied to concrete surfaces. Particularly vulnerable are poorly constructed, porous concrete and mortar joints between brick and flagstone. Ice B'Gone Magic will cause less damage resulting from freeze/thaw cycles than other commonly used de-icers. Keep out of reach of children.

FIRST AID: Eye irritant, in case of eye contact, flush with water for 15 minutes. If irritation persists, seek medical advice. Prolonged skin contact may cause irritation, wash thoroughly. If large doses are swallowed, will cause gastrointestinal irritation. Consult a medical professional.

NON-WARRANTY: No Warranty, expressed or implied, concerning the use of this product is made by the manufacturer or seller other than for the purpose indicated on the label. Manufacturer or seller is not liable for any injury or damage caused by this product due to misuse, mishandling or any other application not specifically described on the label.
