DIRECTIONS FOR USE – TURF GRASSES

LESCO Green Flo Phyte Plus may be applied as a foliar spray application on all turf grasses (cool, transitional and warm season) including lawns, athletic fields and golf courses, fairways, greens and tees.

Precaution: LESCO Green Flo Phyte Plus is a highly concentrated material. Exercise precautions to prevent potential root or foliar burning, or soil media pH changes. If applying LESCO Green Flo Phyte Plus in combination with other materials, a compatibility test is recommended to avoid potential incompatibilities. Prior to the addition of LESCO Green Flo Phyte Plus to a spray mix, the user or application advisor must have experience with the combination or should have conducted a phytotoxicity trial. Do not mix with fixed copper or copper-based fungicides if the pH of the spray solution is below pH 6. Use sufficient water to ensure thorough coverage.

LAWN CARE PROGRAM

COOL, TRANSITIONAL AND WARM SEASON GRASSES: Apply 1-3 fluid ounces per 1,000 sq.ft. of LESCO Green Flo Phyte Plus every 14 days when environmental conditions favor turf stress. Apply 1-3 fluid ounces every 21 to 28 days for general maintenance. Apply in a minimum of 3 gallons of spray solution per 1000 sq ft.

LESCO Green Flo Phyte Plus may be applied as a dilute solution via hand gun or spray boom application. Apply with sufficient water to achieve adequate plant coverage especially during periods of low humidity and high temperature to achieve the maximum benefit of foliar fertilization.

A suggested rate of application of LESCO Green Flo Phyte Plus is 1 gallon per 200 gallons of spray solution. In the absence of specific recommendations, it is recommended to use the standard "jar test" method of compatibility testing with all pesticides prior to mixing.
