

Greens Plus™

14-4-10

65% SRN

A BIOPRO SPECIALTY BLEND

Benefits of Use:

- N-P-K in same ratio as turf tissue
- Low burn potential / low salt index
- SRN for more consistent growth and color
- Enhanced nutrient uptake and tissue nutrient levels from humic acid.
- Minimum growth surges and declines
- Less caustic source of potassium
- P & K remain plant available longer in soil
- Enhances stress tolerance

Problems Addressed:

- Low nitrogen and/or potassium levels in leached or sand soils
- Inconsistent nitrogen response
- Growth surges from quick release N
- Low vigor turf prone to mid-summer stress
- Stunted growth with necrotic leaf tips resulting from potassium deficiency
- Phosphorus deficiency symptoms

Green Plus (14-4-0) is a balanced nutrient blend with nitrogen, phosphorus, and potassium in the same ratios as they are generally found in plant tissue. It is an excellent, superior quality product for general turf maintenance on greens, tees, and other areas of superior quality product for general turf maintenance on greens, tees, and other areas of high quality turf. Nitrogen is supplied in a slow release, extended feed form from a urea-triazone solution, which provides uniform turf growth and color for prolonged intervals between applications. Phosphorus is supplied from Enviro P, a proprietary blend with organic acids which increase the availability and uptake of nutrients. Potassium is supplied from Enviro K, which remains available longer in the soil. Greens Plus is formulated for soil uptake, low burn potential (even at high rates), and can be applied in substantially lower volumes of water due to an extremely low phytotoxicity.
