

## POST EMERGENT HERBICIDES

### SEDGEHAMMER® TURF HERBICIDE

SedgeHammer Turf Herbicide provides post-emergent control of both purple and yellow nutsedge.

SedgeHammer Turf Herbicide is absorbed by the foliage, shoots and roots of sedge plants. The herbicide moves through the plant's vascular system to control the rhizomes and tubers (nutlets). Unsurpassed turf safety on a wide range of both warm and cool season turf grasses.

- ▶ Labeled for use in residential and commercial turf, golf courses and athletic fields. Can be used as a directed spray around established woody ornamentals in the landscape.
- ▶ The addition of a nonionic (0.25% v/v) surfactant is needed for application.
- ▶ Water dispersible granule (WDG) formulation can be tank mixed with other herbicides.
- ▶ Caution signal word, HRAC group 2B.

SKU	DESCRIPTION
35720	SedgeHammer Turf Herbicide 1.33 oz bottle

### SEDGEHAMMER+® TURF HERBICIDE

Ready to mix, small volume package size of SedgeHammer Turf Herbicide for post-emergent control of both purple and yellow nutsedge.

SedgeHammer+ Turf Herbicide is designed to mix in one gallon of water to treat 1,000 square feet of turf. The herbicide is absorbed by the weeds foliage, shoots and roots and is moved through the vascular system to control the rhizomes and tubers (nutlets).

- ▶ Formulation contains a built in nonionic surfactant, so product is ready to mix and apply.
- ▶ Unsurpassed turf safety on a wide range of warm and cool season turf grasses.
- ▶ Convenient package size for backpack sprayers or consumer use.
- ▶ One package will treat 1,000 square feet.
- ▶ Labeled for use on residential and commercial turf, golf courses and athletic fields. Can be applied as a directed spray around established woody ornamentals in the landscape.
