

**KwikRepair™** makes in-line installation or repair of PVC lines faster, easier, stronger and more cost efficient with just 1 fitting. The KwikRepair sleeves slide onto the pipe, once primer and solvent is applied to the end of the fitting and end of the pipe being repaired, eliminating bending or flexing of the pipe.

- Do the job with just one fitting
- Permanent solvent weld seal
- Effective for limited space applications
- No Thrust Blocking or Staking needed
